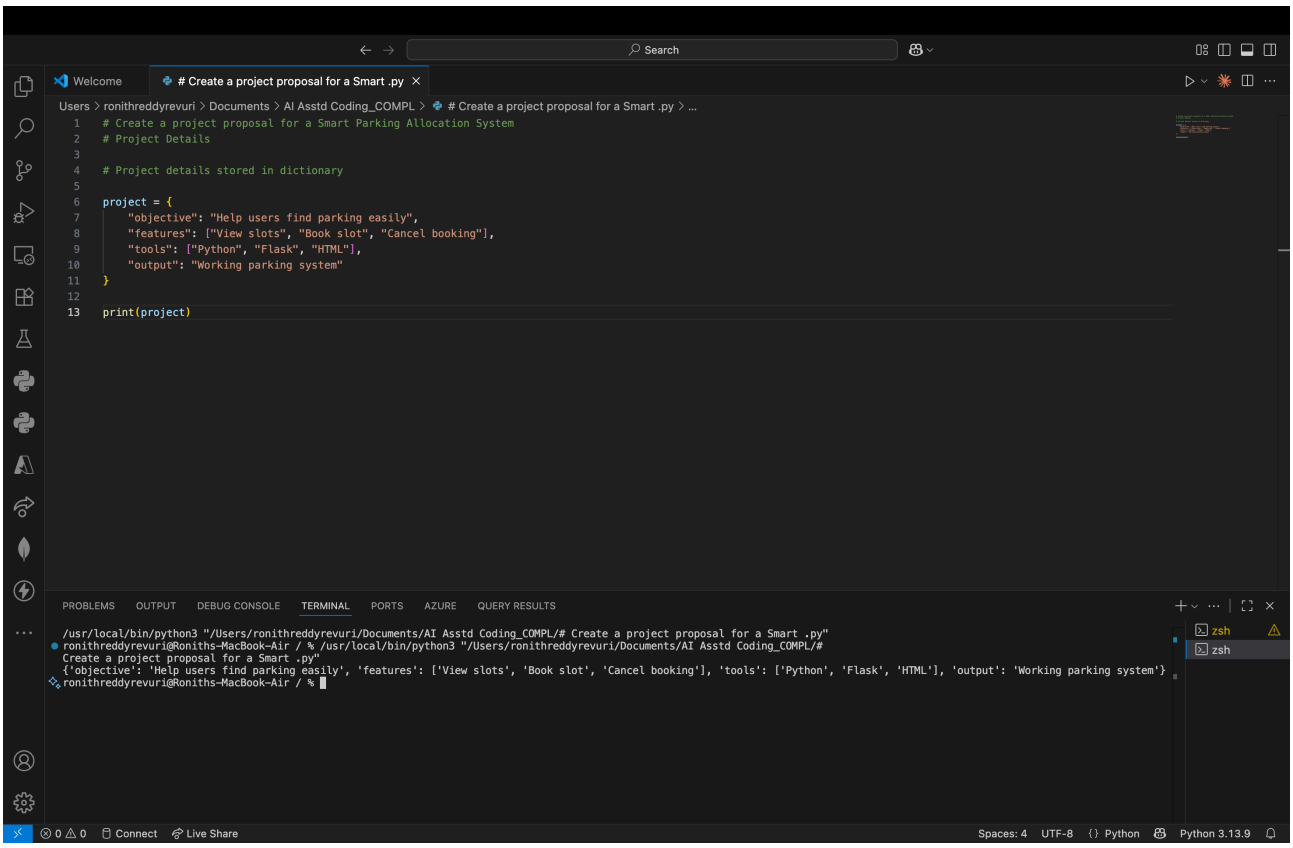
ASSIGNMENT-23

TASK 1 – PROJECT PROPOSAL

PROMPT :
CREATE A PROJECT PROPOSAL FOR A SMART PARKING ALLOCATION SYSTEM.

EXPLANATION :

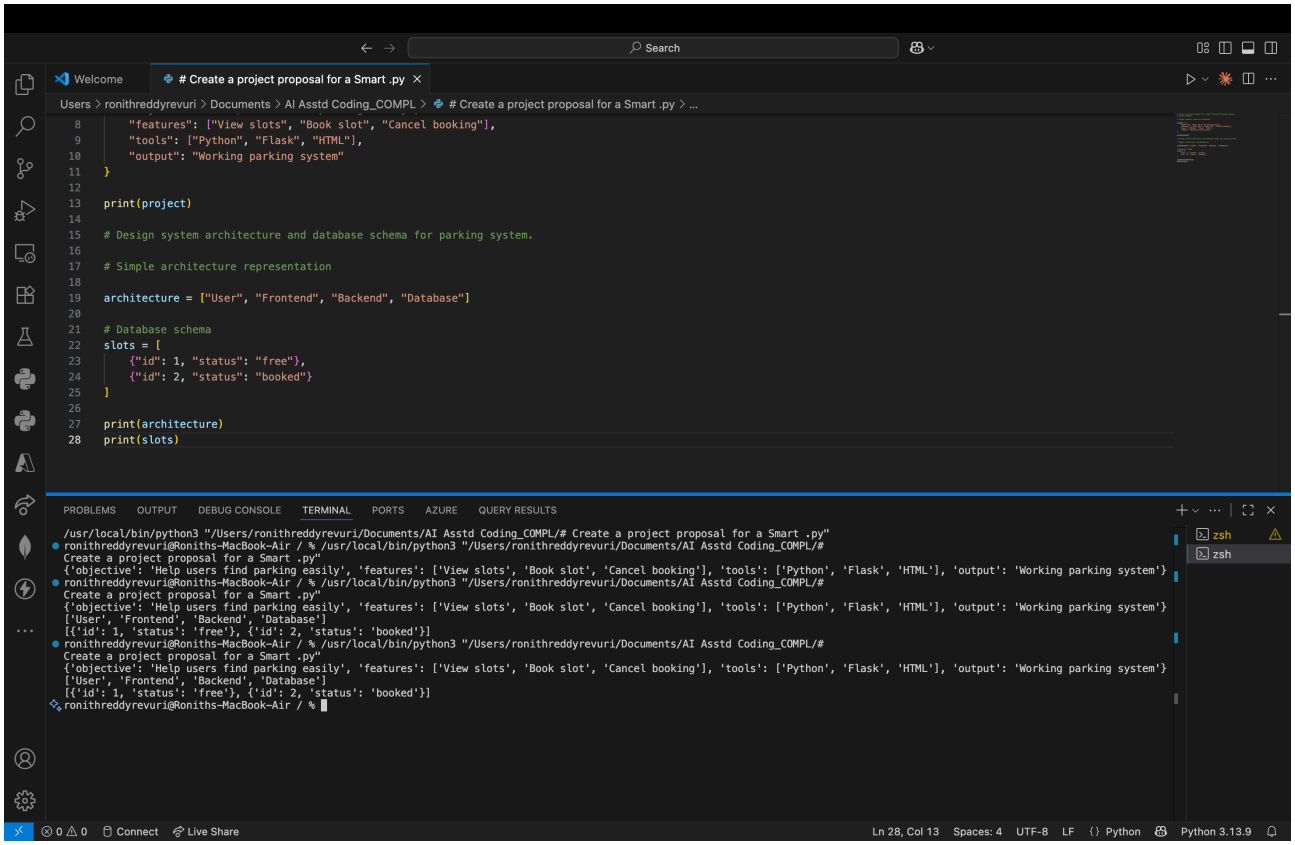
THIS EXPLAINS WHAT THE PROJECT IS ABOUT. IT SHOWS WHAT THE SYSTEM CAN DO AND WHAT TECHNOLOGIES IT USES.



TASK - 2 : APPLICATION DESIGN

PROMPT :
DESIGN SYSTEM ARCHITECTURE AND DATABASE SCHEMA FOR PARKING SYSTEM.

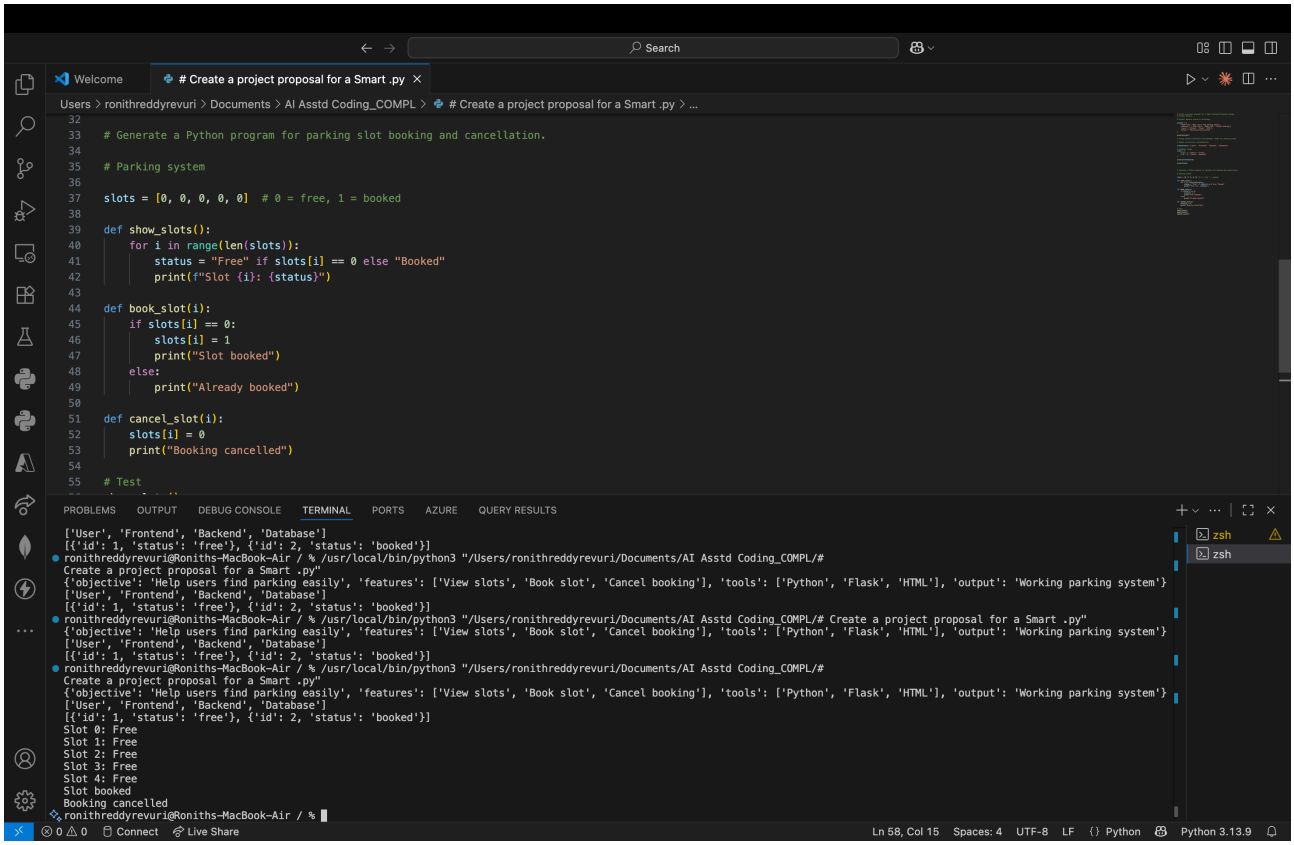
EXPLANATION :
THIS IS HOW THE SYSTEM IS SET UP. IT TELLS YOU HOW DATA MOVES FROM THE USER TO THE DATABASE.



TASK 3 : AI-ASSISTED CODE DEVELOPMENT

PROMPT :
GENERATE A PYTHON PROGRAM FOR PARKING SLOT BOOKING AND CANCELLATION.

EXPLANATION :
THIS IS THE MAIN WAY THAT THINGS WORK. IT LETS PEOPLE SEE, BOOK, AND CANCEL PARKING SPOTS.



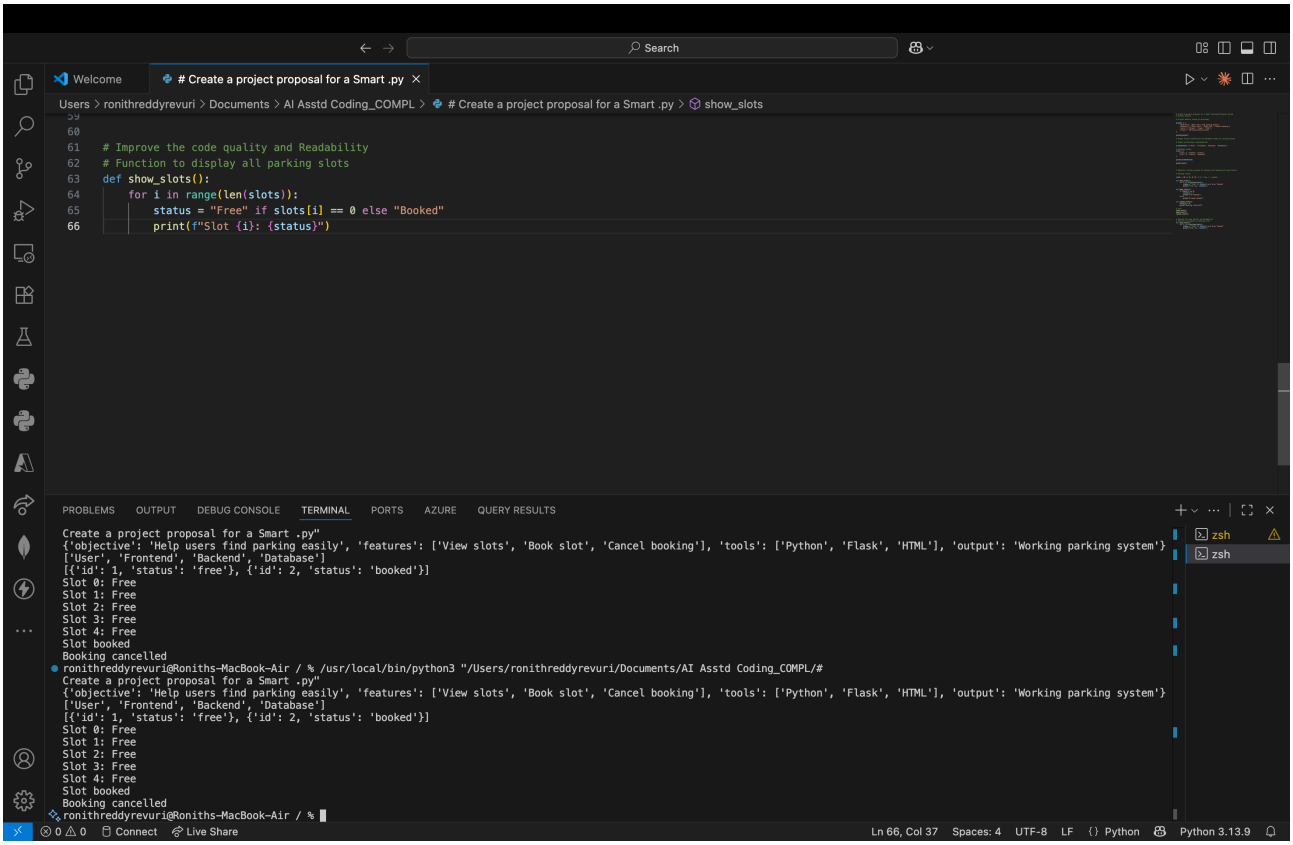
TASK 4 : DOCUMENTATION & CODE QUALITY

PROMPT :

```
# Improve the code quality and Readability
```

EXPLANATION :

COMMENTS TELL YOU WHAT THE CODE DOES. THIS MAKES IT EASIER FOR OTHER PEOPLE TO READ AND KEEP UP WITH.

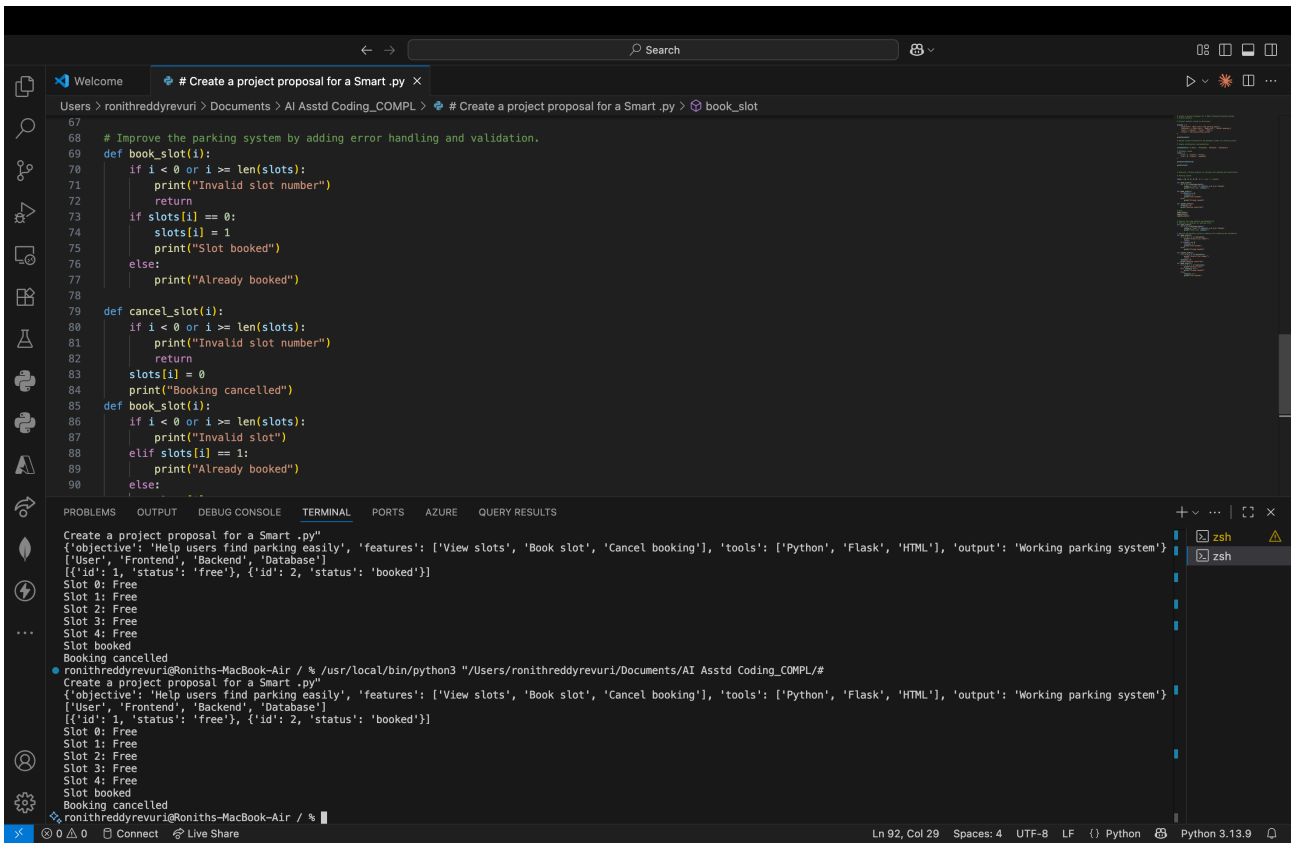


TASK 5 : TESTING & DEBUGGING

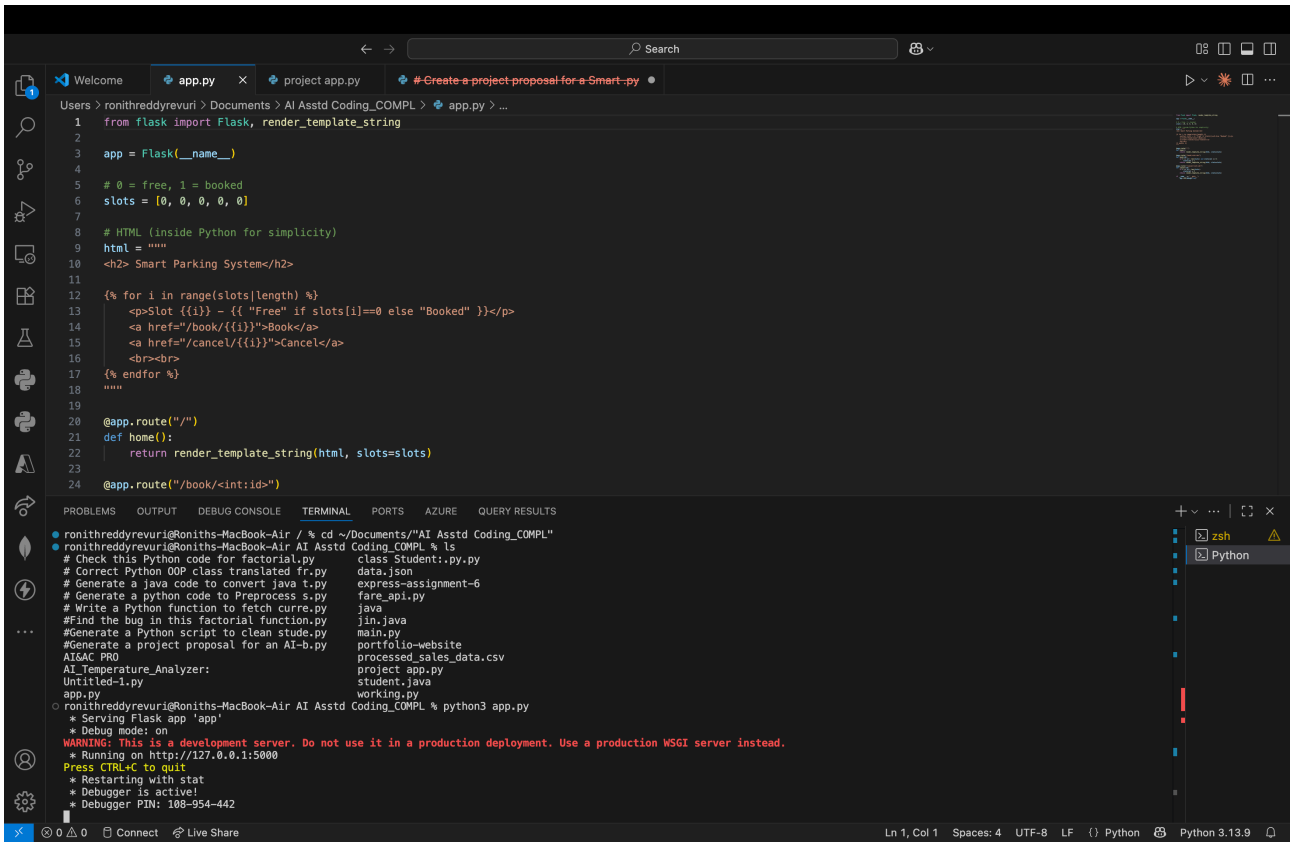
PROMPT :
IMPROVE THE PARKING SYSTEM BY ADDING ERROR HANDLING AND VALIDATION.

EXPLANATION :

THIS STOPS MISTAKES LIKE WRONG SLOT NUMBERS. TESTING MAKES SURE THAT THE SYSTEM WORKS WELL.



TASK 6 : DEPLOYMENT & PRESENTATION

PROMPT :
EXPLAIN HOW TO DEPLOY AND PRESENT THE PARKING SYSTEM PROJECT.


EXPLANATION :
WE CAN RUN THE PROJECT ON YOUR OWN COMPUTER OR PUT IT ONLINE. THE PRESENTATION TALKS ABOUT THE PROBLEM, THE SOLUTION, AND HOW THE SYSTEM WORKS.
